Chrome

Please check your browser to see if Yontoo Layers™ is showing up and is
enabled.

You can easily do this by clicking on the tool icon on the upper right-hand
corner of your browser and navigating to **Tools >> Extensions >>** and make sure Yontoo Layers is
listed.

After you have confirmed this, please make sure you have third party cookies accepted. You can do
this by clicking on the tool icon again, navigating to **Options >> Under the Hood >> Privacy**, clicking
on the **"Content Settings..."** button, and making sure that the **"Allow local data to be set"** radio
button is selected and the **"Ignore exceptions and block third-party cookies from being set"**
checkbox is unchecked.

After you close that window, go back to www.pagerage.com and select a new layout. Once the layout
says "Success", you can then go to www.facebook.com and log into your Facebook account. You will
need to force a refresh of your page by clearing your cache. You can clear your cache by pressing
Ctrl-F5 or pressing the refresh button in your browser. Then the layout you selected should be there.

Firefox

First, check your browser to see if Yontoo Layers™ is showing up and is enabled.

You can easily do this by going to **Tools >> Add-Ons >> Extensions**, scrolling down to the bottom of
the list, and making sure that Yontoo Layers is enabled (the **"Disable"** button is active).

After you have confirmed this, please make sure you have third-party cookies accepted. You can do
this by going to **Tools >> Options >> Privacy** and making sure that in the History section the **"Firefox
will"** dropdown option is set to either **"Remember History"** or **"Use custom settings for history."** In
the case of the latter, make sure the **"Accept cookies from sites"** checkbox is selected, along with
the **"Accept third-party cookies** checkbox underneath it and set the **"Keep until:"** option to **"they
expire."**

Internet Explorer

First, check your browser to see if Yontoo Layers™ is showing up and is enabled. You can easily do this by going to **Tools >> Manage Add-Ons** and making sure the status of Yontoo Layers is "Enabled." After you have confirmed this, please make sure you have third-party cookies accepted. You can do this by going to **Tools >> Internet options >> Privacy >> Advanced**, selecting the **"Override automatic cookie handling"** checkbox, making sure that "Accept" is selected under "Third-party Cookies," and clicking "OK" (and then "OK" again to close the window behind it).

After you close both windows, go back to www.pagerage.com and select a new layout. Once the layout says "Success", you can then go to www.facebook.com and log into your Facebook account. You will need to force a refresh of your page by clicking between Home and Profile on Facebook. Click Home then wait 3-4 seconds. Click Profile then wait another 3-4 seconds. The layout you selected should appear.
